Scrum Master Certification

Pre-course Reading

📘 ***Your Training Starts Here!***

Welcome to the Scrum Master Certification Training. To help you make the most of this intensive programme, we've created this pre-course reading pack to ensure you feel prepared and confident from day one.

📌 ***Contents***

- *Introduction to the Course*
- *Course Overview*
- *Learning Outcomes*
- *Pre-course Preparation Checklist*
- *What to Bring*
- *Introduction to the Exam*

IMPORTANT:

Please complete this reading prior to your course start. The training is fast-paced, and your understanding of these fundamentals will ensure you gain maximum value.

📝 ***What to Bring on Day One***

We recommend bringing:

- *Pens, pencils, and highlighters*
- *Post-it notes and page tabs*
- *Notepad or paper*
- *A simple calculator (optional)*
- *Laptop or tablet (if using digital materials)*

Be on-site by 08:45, as the course begins promptly at 09:00.

📚 *Pre-course Preparation Checklist*

To optimise your learning:

1. *Review the Scrum Guide (https://scrumguides.org/)*
2. *Familiarise yourself with basic Agile terms: Sprint, Backlog, Daily Scrum, etc.*
3. *Reflect on how your current or previous roles relate to project delivery and team collaboration.*
4. *Note any challenges you've faced with team workflow – we'll revisit these in class.*

🎯 *Course Overview*

*The **Scrum Master Certification** course offers a deep dive into the Agile mindset, Scrum principles, and the essential skills required to perform the role of a Scrum Master in today's fast-moving, team-oriented environment. Over the training, you will gain knowledge of the **Scrum framework**, its events, artefacts, roles, and how to guide and coach Agile teams effectively.*

This pre-course pack provides a foundational overview of Scrum and Agile and introduces concepts you will apply during the course through exercises, discussions, and group activities.

🎓 *Learning Outcomes*

By the end of this training, learners will be able to:

- *Understand and articulate the **Agile mindset and values***
- *Explain the **Scrum framework**, including all roles, events, and artefacts*
- *Facilitate Scrum events such as **Daily Stand-ups**, **Sprint Planning**, **Retrospectives**, and more*
- *Apply the principles of **empiricism**, **self-management**, and **iterative development***
- *Guide teams towards continuous improvement and high performance*
- *Prepare for and successfully pass the Scrum Master certification exam*

🔄 *What is Scrum?*

*Scrum is a **lightweight Agile framework** for developing, delivering, and sustaining complex products. It is based on **empiricism** (knowledge through experience) and **Lean thinking**. Scrum works in short iterations called **Sprints** (1–4 weeks) and includes regular feedback loops to adjust quickly.*

👥 *Scrum Roles*

- ***Scrum Master** – Ensures Scrum is understood and enacted; serves the team by removing blockers*
- ***Product Owner** – Owns the product vision and backlog; prioritises work based on value*
- ***Developers** – Cross-functional team members who build the product incrementally*

🧪 *About the Exam*

- ***Type:** Multiple-choice*
- ***Total Question:** 50*
- ***Total Marks:** 50 Marks*
- ***Pass Marks:** 74% or37/50 Marks*
- ***Duration:** 60 minutes*
- ***Openbook/closedbook:** Open Book*
- ***Tip:** Read each question carefully, and apply your learning to real-world scenarios*
